**Revised Edition
with AVR PLAYGROUND
and ELEKTOR UNO R4**

Mastering Microcontrollers Helped By Arduino

www.elektor.com/arduinoobook
Third, extended and revised edition

Table of Contents

1. Quick Start Guide	11
<hr/>	
1.1 Software Installation	11
1.2 Installing the Hardware	11
1.2.1 Windows (XP or Later)	12
1.2.2 Mac OS X	15
1.2.3 Linux	16
1.3 Hello World	17
2. Introduction	19
<hr/>	
2.1 Someone Knocks at the Door	19
2.2 Where Are We Going?	20
3. Know Your Opponent	23
<hr/>	
3.1 A Short History of Microcontrollers	23
3.2 They are Cute, but What's Inside?	24
3.2.1 The Processor	25
3.2.2 The Oscillator	25
3.2.3 Memory	26
3.2.4 Interrupts	27
3.2.5 Input/Output Ports	27
3.2.6 Analog-to-Digital Converter	28
3.2.7 Digital-to-Analog Converter	28
3.2.8 Communication Modules	29
3.2.9 Time Management	30
3.2.10 Other Peripherals	31
3.3 Tools	31
3.3.1 Programming	32
3.3.2 Loading the Program into the MCU	34
3.3.3 Debugging	35

4. Rapid Prototyping Italian Style 37

4.1	The Godfather 1, 2 and 3	37
4.2	Pasta, Cheese and Tomato Sauce	39
4.3	Base Ingredients	41
4.4	The Kitchen	45
4.4.1	File Menu	47
4.4.2	Edit Menu	48
4.4.3	Sketch Menu	50
4.4.4	Tools Menu	51
4.4.5	Help Menu	53
4.4.6	Manage the Tabs	54
4.5	The Service	54
4.5.1	Table Setting	55
4.5.2	The Headwaiter	56

5. My First Offense 57

5.1	The Wrench	58
5.2	Get to Know the Hood	60
5.3	Preparing the Job	61
5.4	A Sizeable Problem	62
5.5	The Snitch	63
5.6	Flashing Lights	64
5.7	Incarcerated	65
5.8	Out on Parole	66
5.9	Reintegration	70

6. Digital Signals: All or Nothing 71

6.1	Surprises	71
6.2	More Surprises	74
6.3	The Matrix Keyboard	75
6.4	Charlie to the Rescue	77

6.5	Repeat Yourself	80
6.6	The Story of the Three Loops	81
6.6.1	for	82
6.6.2	while	83
6.6.3	do-while	84
6.7	More Keys	85
6.8	Ghostbusters	87
6.9	Tables	88
6.10	LED Mini-Display	91
6.11	The Parade	94
6.12	A Little Scam	98
6.13	Making New Friends	106
6.14	Null Does Not Equal Zero	107
6.15	Snow White's Apple	108
6.16	The Core	110
6.17	A Trick	112

7. Analog Signals: Neither Black Nor White 115

7.1	The Digital Switchover	115
7.1.1	Type Conversion	118
7.1.2	The Bulk of the Budget is Spent on Representation Costs	119
7.1.3	Arduino as Oscilloscope	120
7.1.4	A Tip	121
7.1.5	ADC References	122
7.2	Back to Analog	123
7.3	Look Ma, No Hands!	125
7.3.1	Motor Driver	125
7.3.2	Obtaining a Step Response	130
7.3.3	The Compound if	134
7.3.4	The PID Controller	135
7.3.5	The Digital Filter	138
7.3.6	Dynamic Duo	139
7.3.7	Nerd Corner	144
7.3.8	Sneak Preview	145
7.4	Recreation: the Misophone	145

7.5	A Bit of C++	150
7.6	The No in Arduino	152
7.7	Look Ma, No Arduino!	154

8. Communication: an Art and a Science 157

8.1	Visualize Your Data	159
8.1.1	Connect a Liquid Crystal Display	160
8.2	The Act of Communicating	162
8.2.1	Asynchronous	162
8.2.2	Synchronous	164
8.3	RS-232 or Serial Port?	164
8.3.1	A Few Subtleties	166
8.3.2	Chaining Characters	168
8.3.3	Breaking the Chains	173
8.3.4	An NMEA 0183A Decoder	175
8.3.5	Mutatis Mutandis	178
8.3.6	Make a U-turn Now	180
8.3.7	A Curly Symbol	186
8.4	Two-Wire Connections	187
8.4.1	I ² C, TWI and Arduino	188
8.4.2	Atmospheric Pressure Sensor	189
8.5	Three- and Four-Wire Connections	197
8.5.1	Improved Driver for Graphic Display	198
8.5.2	Humidity Sensor	202
8.6	All Together	209
8.7	When Arduino Isn't Around	213
8.8	Pointers	214
8.9	Did you Know?	218

9.	The Clock is Ticking	221
9.1	This is Radio Frankfurt	221
9.1.1	DCF77	222
9.2	Daisy-Chaining Seconds	225
9.3	Decode a String of Bits	229
9.3.1	DCF77 Decoder	230
9.4	Millis and Micros, Two Little Functions	234
9.5	PWM	235
9.5.1	Two Types of PWM	235
9.6	The Master of Time	236
9.6.1	DCF77 Transmitter	239
9.7	Could do Better	246
9.8	Expecting a Happy Event	248
9.8.1	Sort Your Infrared Remote Controls	250
9.9	Break or Continue	254
9.10	Divide and Conquer	254
9.11	The Structured Union of Types	255
9.11.1	struct	255
9.11.2	union	256
9.11.3	typedef	256
9.12	Is It an Image? Is It data? It's Superfile!	257
9.12.1	The SVG File Format	258
9.13	What They Really Say	262
9.13.1	The NEC-1 Protocol	263
9.14	To goto Or Not to goto	268
9.15	Frame It Yourself	270
9.15.1	Composition	270
9.15.2	Exposure Time	274
9.15.3	Capturing Volatile Moments	275
9.16	Occupation: Rioter	276
9.17	Summarizing	282
9.17.1	Normal Mode	282
9.17.2	CTC Mode	282
9.17.3	Capture Mode	283
9.18	May The Force Be With You	283

10. Interrupts - Pandora's Box	285
10.1 My First Interrupt	286
10.1.1 Timer/Counter 0	286
10.1.2 Generating a 1 kHz Signal	287
10.2 The Devil in Disguise	289
10.2.1 What's Our Vector, Victor?	290
10.3 Message in a Bottle	294
10.4 Spinning Out Of Control	295
10.5 Knock on Any Door	298
10.5.1 Let's Make a Flip-Flop	298
10.6 One Interrupt Too Many	300
10.6.1 The Stack	301
10.7 Who's That Knocking At My Door?	302
10.7.1 Multiplexed Interrupts	303
10.8 Long Live the Rotary Encoder!	305
10.9 Reset In Every Possible Way	311
10.9.1 POR, BOR and BOD	312
10.10 Let's Switch Roles	313
10.10.1 The Annoiser	313
10.11 La Cucaracha	316
10.11.1 The 1-Wire Protocol	319
10.12 Fire!	324
10.12.1 The SMBus	325
11. Circuits and Exercises	331
11.1 Introduction	331
11.1.1 One Size Fits All	331
11.1.2 Here We Go!	332
11.2 LED Dimmer	332
11.3 Motor Driver	335
11.4 The Misophone Revisited	336
11.5 Visualize Your Data	339
11.6 GPS Experiments	340

11.7	Barometer	342
11.8	Humidity and Temperature Meter	345
11.9	DCF77 Receiver	347
11.10	DCF77 Transmitter	348
11.11	Infrared Receiver	349
11.12	Infrared Transmitter	351
11.13	Rioter	352
11.14	Annoiser	354
11.15	La Cucaracha in Stereo	354
11.16	Fire Detector	357
11.17	Bonus	358

12. AVR Playground 361

12.1	The Hardware	361
12.1.1	Extension Connectors	361
12.1.2	Pushbuttons & LEDs	361
12.1.3	Power Supply	364
12.1.4	USB-to-Serial Converter	364
12.1.5	Human Interface Devices	365
12.1.6	Switches	366
12.1.7	More than Arduino	367
12.1.8	Crystal	368
12.1.9	Reset	368
12.2	Software	368
12.2.1	Installing the AVR Playground	368
12.2.2	Enter Game Programming	370
12.2.3	Mapping Ports	372
12.2.4	Set Them DIP Switches	373
12.2.5	Controlling LEDs	376
12.2.6	Reading Pushbuttons	377
12.2.7	Random Numbers	379
12.2.8	Play a Sequence	381
12.2.9	Add Sound	381
12.2.10	Processing User Input	382
12.2.11	Play the Game	383
12.2.12	PC Display	385
12.2.13	Printing Numbers	387

13. Elektor Uno R4	389
13.1 Four pins make all the difference	389
13.2 From A to B	389
13.3 Take the R4	390
13.4 Installing the R4	393
13.5 Libraries	396
13.6 Examples	396
13.6.1 Digital read and write of Port E	396
13.6.2 Analog out	397
13.6.3 Serial & Serial1	399
13.6.4 Wire & Wire1	399
13.6.5 SPI, SPI0 & SPI1	399
13.6.6 PWM & OCM	404
Programs Overview	411
Illustrations Overview	412
Tables Overview	420
Index	422
